

Stream XP₂ Qx Streaming pre amplifier; a cornerstone for building a modern hi-fi system

Product Information:

Recognised by thirty years of awards and accolades, Cyrus consistently pushes the boundaries of audio technology. We're tirelessly working towards the ultimate hi-fi system, which will reproduce the sound and feeling of a live performance without any interference or loss of detail.

Stream XP₂ Qx incorporates our streaming engine with a high performance DAC and pre amplifier. Using our most advanced streaming technology along with our superb Qx DAC, the Stream XP₂ Qx will make your music come alive.

As with all Cyrus products, the Stream XP₂ Qx is a long term investment in high quality audio. As streaming technology advances, you will be able to upgrade the Stream XP₂ Qx for new Cyrus products.

Stream XP₂ Qx features and benefits

Advanced Audio Streaming Engine:

Supporting all popular formats, Stream XP₂ Qx is able to stream audio from USB, NAS drives or even iPod devices in high resolution up to 24/192.

High Performance Pre Amplifier and DAC:

Stream XP₂ Qx features our high performance analogue pre amplifier and the award winning Qx DAC. Clock regeneration and upsampling to 24bit/192khz improve all digital music sources either internally or connected externally. The exceptional low level response allows even the smallest signals to be conveyed more faithfully

Essential Connectivity:

Wi-Fi or Ethernet, integration into your home network is effortless and reliable. Additional sources? No problem, there are 5 digital inputs, fixed and pre analogue outputs for future upgradability. There is even a class A headphone amplifier built in as well. Finally the Stream XP₂ Qx features the PSX-R port for instant sonic improvement across all sources.

Internet Radio:

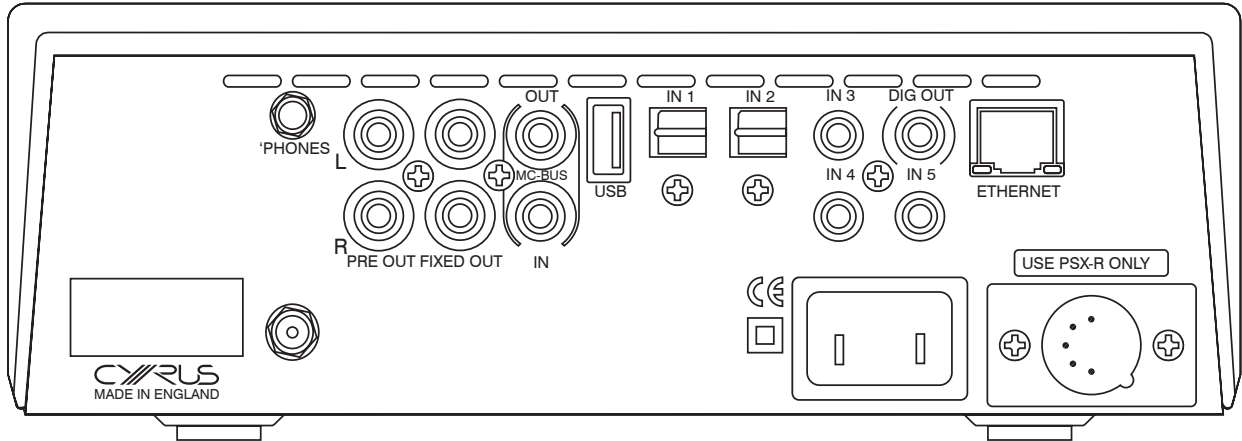

If you love radio, you'll love Tuneln radio. With over 100,000 channels available, both local and national, the choice for music is as endless.

Effortless Control:

Once connected, download our free Cadence app from iOS App Store or Google Play Store for a complete and intuitive control system. All key system functions, along with playlist creation and storing favourite internet radio stations, are available when using Cadence.

Cyrus audio products are designed, manufactured and supported at our headquarters in Cambridgeshire, England.

All Cyrus components are manufactured in an advanced die-cast aluminium chassis and this hand finished casework is an integral part of the products' sound. It's not just about good looks; the chassis composition is specifically designed to create an electronically shielded and mechanically vibration-free environment for the sensitive audio circuits which are hung inside the inverted chassis, avoiding unwanted electric currents and secondary magnetic fields so the sound you hear is the very best that it can be.
