

Cyrus 6 DAC Integrated amplifier and digital to analogue converter in one

Product Information:

Recognised by thirty years of awards and accolades, Cyrus consistently pushes the boundaries of audio technology. We're tirelessly working towards the ultimate hi-fi system, which will reproduce the sound and feeling of a live performance without any interference or loss of detail.

The amplifying section of the Cyrus 6 DAC comes from the Cyrus 6a, our award winning high quality amplifier. Its built-in digital to analogue converter reads the highest 24 bit files and transforms them into the music your speakers love in high definition.

As well as including the Cyrus 6 DAC in your hi-fi system, you can use it to play music directly from your computer or plug it into your TV or satellite box.

This high quality amplifier and DAC will put new life into your music or films with a touch of our trademark Cyrus tuning.

Cyrus 6 DAC features and benefits

Trickle Down Advanced Technology:

The Cyrus 6 DAC delivers surprising audio performance and value because it is based on the advanced preamplifier circuitry from the DAC XP Signature; benefitting from a 'trickle down' of our most advanced technology.

Integrated Amplifier:

The bi-wire output of the 6 DAC gives a full 57 Watts into 6 ohms. The power supply is a high current design that uses two transformers to completely separate the digital control stages from the sensitive audio signals.

Integrated DAC:

The 6 DAC features a high performance 24/192 DAC bringing optical and coaxial inputs and a driverless USB connection, allowing plug and play connectivity to a PC or laptop.

Essential Connectivity:

Six analogue inputs, a high quality headphone amplifier, Zone 2 and pre amplifier outputs give the 6 DAC flexibility for connecting a wide variety of audio devices.

Advanced Setup:

The microprocessor controlled operating system in the 6 DAC allows extensive programming of many functions within the unit. Input naming, differing display readouts and input volume matching across all sources are just some of the possibilities.

Cyrus audio products are designed, manufactured and supported at our headquarters in Cambridgeshire, England.

All Cyrus components are manufactured in an advanced die-cast aluminium chassis and this hand finished casework is an integral part of the products' sound. It's not just about good looks; the chassis composition is specifically designed to create an electronically shielded and mechanically vibration-free environment for the sensitive audio circuits which are hung inside the inverted chassis, avoiding unwanted electric currents and secondary magnetic fields so the sound you hear is the very best that it can be.

Suggested Systems

6 DAC + CD t

6 DAC + Stream X Signature

Cyrus 6 DAC Specifications

Integrated amplifier

24 bit/192k DAC

Custom input naming

iR14 Remote control included

5 digital / 6 analogue inputs

USB input

Pre out

Zone 2 output

Headphone amplifier

2 x 57W into 6 Ω

Dimensions (H x W x D) – 73 x 215 x 360 mm

Weight – 5kg
